

MARK ALDRIN M. QUIPIT

As a passionate and detail-oriented undergraduate programmer, I excel at transforming complex problems into elegant, efficient solutions. Driven by a fascination with technology, I explore new tools and frameworks, building on my full-stack development experience. I am particularly skilled at creating interactive, user-focused applications that deliver high-quality, professional software.

WORK EXPERIENCE

Agricultural E-Commerce System	
University of Cabuyao – Capstone Project	Sept 2025 - Dec 2025
- Led as Senior Developer, making key technical decisions and overseeing project quality while developing both frontend and backend for a multi-role system. - Implemented user authentication, role-based access, database architecture, and system workflows, ensuring performance, usability, and security. - Coordinated the team, conducted quality assurance and testing, and ensured the successful delivery of the capstone project.	
Medical Appointment System	
University of Cabuyao – Project	Feb 2025 - Apr 2025
- Developed a Medical Appointment System using PHP and MySQL, implementing scheduling, authentication, and role-based access. - Built a responsive UI with HTML, CSS, JavaScript, and Bootstrap, using Git for version control.
